

FOR IMMEDIATE RELEASE

Calgary HandiBus Chooses Gatekeeper Rugged Mobile Video Systems to Increase Safety and Protect Riders

Abbotsford, BC May 14, 2013 Indigo Sky Capital Corp. (Indigo Sky' or the 'Company') (TSX-V:IDS)

is pleased to announce Calgary HandiBus has selected Gatekeeper Systems to install Gatekeeper video technology on their bus fleet .

After researching various surveillance system providers, Scott Kirchner, Supervisor of Employee Services of Calgary HandiBus explains what influenced their decision: "When we did our investigation many service providers had surveillance technologies with a regular hard drive, but Gatekeeper offered a solid state DVR. We do a lot of pick-ups in alleys and operate in extreme hot and cold environments so we wanted reliable devices. We have been very impressed with the quality of the 504HD DVRs".

Calgary HandiBus delivers highly personalized door-to-door, shared ride service to anyone with permanent or temporary physical, and or developmental disabilities, who are unable to use regular transit. Calgary HandiBus's list of requirements included protecting passengers and drivers from harassment, protecting themselves from false liability claims, and ensuring drivers are focused exclusively on the road while driving. The safety and comfort of their passengers and drivers is a top priority.

Scott has found that Gatekeeper's total video solution is helping them achieve their goal of improving safer transportation. In addition to safety, reducing liability is a huge benefit for Calgary HandiBus. "We were dealing with a he said/she said atmosphere. Finding incidents is quick and easy with G4™ Incident Management software. The technology is also a good learning tool for drivers. Improving driving habits and using the technology for training new hires is an added benefit. I'd say 98% of the time it's there to protect drivers from false claims and lets them keep their eyes on the road" says Scott.

To deliver safer transportation, Calgary HandiBus turned to technologies from Gatekeeper Systems Inc. and plans to install Gatekeeper's technologies on all 107 vehicles.
