Gatekeeper Launches New School Bus Vision Technology to Protect Kids from Stop-Arm Violators

Abbotsford, BC --- October 30, 2018 --- Gatekeeper Systems Inc. (“Gatekeeper” or the “Company”) (TSX.V: GSI; OTC: GKPRF; FSE: 1GK) unveiled its new SP25 10-megapixel dual-camera system today featuring crystal clear image quality and superior range, which will make it a powerful new weapon in the fight against school bus stop-arm violators. The compact, quick to install system attaches to the side of school buses and provides outstanding picture quality in bright, low-light, and night-time conditions between 98 to 164 feet (30 to 50 metres) with coverage across multiple highway lanes.

“This system is a game-changer: It’s going to ensure a safer environment for kids in and around school buses, and provide peace of mind for operators, administrators, legislators and, most of all, parents,” says Doug Dymont, President and CEO of Gatekeeper. The SP25 is being unveiled this week at the National Association of Pupil Transportation (NAPT) conference in Kansas City, Missouri. He added, “It’s a powerful deterrent to drivers thinking about running the stop-arm sign and will provide the legal system with irrefutable evidence when prosecuting those who commit this unforgiveable crime.”

“Keeping kids safe is at the very core of our business,” says Dymont. “Yet, with more than an estimated 15 million stop-arm violations per year in the United States alone, we are reminded that kids are very much at risk. Sadly, we saw a horrific accident in Colquitt County, Georgia last week when one child was killed, and his brother seriously injured by a stop-arm violator. Frankly, it’s senseless crimes like this that drive us to build better products.”

He says that: “While stop arm technology may not prevent all deaths and injuries, it should reduce incidents by reminding violators that they will receive a serious fine if they don’t stop and law enforcement will have video footage as part of its evidence program when prosecuting violators.”

The SP25 builds on Gatekeeper’s proven technology by offering a multi-lane viewing licence plate capture capability, a high-speed licence plate tag reader, and cellular network compatibility ready for remote, auto downloading of stop arm violations. And it features an integrated Global Positioning System with time, date, and vehicle sensors which meet State regulations and laws. This means that authorities can issue tickets to violators putting real teeth in the legislation designed to keep kids and operators safe. Photos of day and night operations are provided at the bottom of this release.

Each camera weighs just 1.1lbs (500 grams) and measures 2.8” X 4.4” X 2.7” (70mm X 113mm X 68mm and has a base diameter of 3” X 3.5” (8cm X 9cm). Units can operate in the harshest of weather and are rated from -40°F to +158°F (-40°C to +70°C).

The NAPT conference hosts more than 600 delegates from across North America who are focused on the latest in school bus transportation including developments that provide a safe passage on and around the bus.

Night and day: Gatekeeper unveiled its new camera system that captures the licence plates of stop-arm violators in a range of conditions from daylight to night-time. This makes the area in and around school buses safer for kids and provides a powerful tool to law enforcement and school bus authorities.

About Gatekeeper Systems Inc.

Gatekeeper Systems Inc. provides wireless high-definition video security and safety solutions for in-transit applications, including school buses, municipal transit, law enforcement and military. The company offers wireless live-streaming video surveillance, video analytics, driver monitoring, and incident management solutions to help protect school children, public transit users and employees while on the move. The company has unique photo enforcement and auto-ticketing solutions which deter stop-arm violations and protect school children. Gatekeeper has installed more than 100,000 video devices for more than 3,500 customers throughout North America. For more information visit: www.gatekeeper-systems.com.

On behalf of the Board,

"Douglas Dymant"

President & CEO

Cautionary Note Regarding Forward-Looking Statements: This release includes certain statements and information that may contain forward-looking information within the meaning of applicable Canadian securities laws or forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. All statements in this news release, other than statements of historical facts, including statements regarding future estimates, including projected sales and revenue, plans, objectives, assumptions or expectations of future performance are forward-looking statements and contain forward-looking information. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "intends" or "anticipates", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "should", "would" or "occur". Forward-looking statements are based on the opinions and estimates of management as of the date such statements are made, including that new contracts will be awarded as expected by management and they are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements or forward-looking information, including the Company not being awarded new contracts and being unable to realize expected sales or revenues. Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements and forward-looking information. The Company does not undertake to update any forward-looking statements or forward-looking information, except in accordance with applicable securities laws. To the extent that any forward-looking information constitutes future-oriented financial information or financial outlooks within the meaning of securities laws, such information is being provided to inform the reader of the potential financial impact of expected results and may not be appropriate for other purposes. We seek safe harbour.
