

DISPLAY MONITORS

Gatekeeper is pleased to offer a line of analog, high-resolution, AHD 1080p monitors, ideal to use with Gatekeepers' Rear Vision System or Gatekeeper's SV12 360° Surround Vision Camera System for blind-spot detection. These monitors are available in 5", 7" and 9" and are 16:9 wide screen format. All monitors come standard with a fan style mounting plate. There is also an optional adjustable mounting pedestal available that allows for a 210° tilt and a full 360° rotation. The monitors support 2 video input channels. An input trigger allows the monitor to automatically switch to Channel 2 when it is activated. The AHD monitor can be set to show a blank screen until the monitor senses a video signal on one of the video channels.

GATEKEEPER
